AKSAH ATLAW

Aspiring Software Developer | Software Engineering Student

Addis Ababa, Ethiopia • Phone: [Your phone number] • Email: [Your email address]
LinkedIn: [Your LinkedIn URL] • GitHub: [Your GitHub URL]

PROFESSIONAL SUMMARY

Motivated Software Engineering student building a strong foundation in programming, problem-solving, and software development. Familiar with C++, Dart, Flutter, SQL/MySQL, and Git, with hands-on learning through programming exercises and project work. Interested in creating practical applications that solve real problems, collaborating with developers, and continuously improving software engineering skills.

TECHNICAL SKILLS

Programming	C++, Dart (foundational)
Frameworks & Libraries	Flutter (learning), raylib (project exposure)
Databases	SQL, MySQL; relational concepts, joins, views, and queries
Tools	Git, GitHub, Visual Studio Code, Android Studio
Core Concepts	Data structures, modular programming, OOP fundamentals, file handling, debugging

PROJECT EXPERIENCE

Physics Motion Simulation — C++ / raylib

Academic / collaborative project

- Contributed to a graphics-based physics simulation exploring free-fall, projectile motion, and linear motion.
- Worked with C++ classes, variables, update logic, collision checks, and basic physics calculations.
- Used raylib concepts to support visual rendering and interactive simulation behavior.

Student Time-Management App — Flutter (Learning Project)

Personal project concept

- Developing the concept for a student-focused application that organizes a 24-hour day into three 8-hour blocks.
- Exploring Flutter UI development and how software can support practical time-management workflows.

EDUCATION

Bachelor’s studies in Software Engineering

[University name] • [Start year – Expected graduation year]

ADDITIONAL LEARNING

- C++ programming: structures, unions, arrays, functions, STL collections, templates, and file I/O.
- Database fundamentals: relational algebra, SQL queries, aggregate functions, joins, and views.
- Flutter and Dart: environment setup and foundational application-development concepts.

PERSONAL STRENGTHS

Problem-solving • Self-directed learning • Analytical thinking • Team collaboration • Attention to detail

Before applying: replace all bracketed placeholders, verify the project descriptions, and add only skills you can confidently discuss in an interview.
